

## **Moody International Certification (MIC) Japan Ranked No.1 Certification Body in Japan**

*ISOS*, Japan's most prestigious monthly magazine in the ISO certification industry, recently completed a survey in which the capabilities of all 80 active ISO certification bodies in Japan were evaluated.

The survey was conducted via questionnaire, and the results of the ratings were placed into seven categories. Those categories were:

1. Overall competency / integrity
2. Auditee's management ability
3. Auditor's competence
4. Effectiveness of audit
5. Certification body's overall service
6. Customer loyalty
7. Management of problem solution

As a result of the survey, MIC Japan was ranked as the No.1 Certification Body in Japan. This same survey was conducted in 2003, and at that time MIC Japan was also ranked No.1.

**Congratulations MIC Japan for a job well done!**
